GREAT IMPROVEMENT IN DENTIS-

The attention of the public is called to a great discovery in Dentistry.

discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while cating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hithertoused. I have secured Letters Patent for the United States, England and France.

The improvement is not in material, but in the construction, whichs centres the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoulle and Grand Isle. Those wishing to avail themselves of such improvement, will call on

FEW TESTIMONIALS.

TROY, N. Y., June 12, 1868.

Dr. Gridley—This is to certify that I called on you at Plattsburgh, in September, 1867, to be treated for difficulties that have made me about helpless for the past ten years,—namely, an abscess on each side of my limbs, with white swelling in and around my knee—which had defied the skill of our best physicians, both in my town and in New York city. For the benefit of the public, I will state that I am perfectly cured, and have been attending to my business since March 1st, 1868. Hoping this may prove of benefit to you, I remain,

Yours most truly,
